ELITE DAIRY 20 + MONENSIN PELLETT

The Elite Dairy 20 Premix is a great product to use on Farm, or in a Mash Feedmill situation. Being a pellet it increases mixability in mash feeds.

It is formulated to meet the requirements of a Dairy Cow and contains the macro minerals and vitamins to support, production, fertility & general health of the herd. Wherever possible the minerals are in the form of sulphates, which increases bioavailability compared to oxides & Monensin is included to improve feed efficiency. If there are any metabolic issues presenting in the herd, or the herd is a high producing herd, then it would be advisable to try our Maxilac 10 Premix or Ultralac range.

Our sales and nutritional team can advise which premix and feed additives are best suited to your herd.

[U/RATE]	G/H/D	20.00
VIT A	IU	30000
