ELITE GRUNT 1000

Elite Grunt 1000 has been formulated by the highly regarded nutritional team at ACE Livestock Consulting, using specific and required ingredients to meet the nutritional requirements of the newly weaned piglet and its gastrointestinal tract. This product aims to ensure a smoother weaning transition, allowing the pig to express its full genetic potential.

This diet has been designed for the piglets to have a total intake of 1-1.5kg/pig post weaning. The diet is predominantly targeted at pigs weaned prior to 23 days of age. After eating the recommended amount, the pigs will advance to the next dietary level - **Elite Pig Starter 510**.

Elite Grunt 1000 contains spray dried porcine plasma to provide immune protection, improve feed intake and promote tissue growth and repair whilst limiting and controlling inflammation; a quality vitamin premix; cooked cereals and milk powders to improve feed intake; a unique amino acid profile to aid tissue growth and repair; nucleotides to aid immune development and improve feed conversion; and other gut modifier products which promote growth and assist in raising the pigs immune status.

The product is presented as a crumble and is available in 25kg bags.

Contact the nutritional team for customised support for your individual feeding program.

SPECIFICATIONS

SID LYSINE	1.36%
ENERGY	11.25 MJ NE
SID LYS/NE	0.121
MAX PROTEIN	20%
